## Objective

Highly skilled Laravel/PHP Backend Developer with 5 years of experience, specializing in scalable web applications, multi-database architecture, REST API development, system optimization, and secure authentication workflows. Expert in designing robust backend systems using Laravel, JWT, repository patterns, and micro-service-style API structures. Experienced in delivering production-ready solutions for FinTech, CRM, and SaaS platforms, including multiple live web + mobile app backends. Strong believer in clean code, security best practices, and performance-driven development.

## Technical Skills

- Backend: PHP, Laravel (Expert), CodeIgniter
- APIs: REST APIs, JWT Auth, OAuth, API Security
- Databases: MySQL, PostgreSQL
- Frontend: HTML, CSS, JS, jQuery, Ajax, Axios
- Tools: Git, GitLab, Bitbucket, Swagger, Cron Job
- Other: WordPress Backend, WebSockets, Payment Gateway APIs, Server Management (cPanel, GoDaddy)

## Projects

### • Subhx Connect – Broadband CRM & Service Operations Management

**Website:** <https://subhxconnect.com>

**Mobile Apps:**

1. **Customer App** – [https://play.google.com/store/apps/details?id=com.connect.subhx\\_connect](https://play.google.com/store/apps/details?id=com.connect.subhx_connect)
2. **Engineer (In-house) App** – [https://play.google.com/store/apps/details?id=com.subhx.connect\\_inhouse](https://play.google.com/store/apps/details?id=com.subhx.connect_inhouse)

**Role:** Laravel Developer

**Tech:** Laravel, PostgreSQL, JWT, AES-256, Redis Queue, WebSockets, Payment Gateways, REST APIs.

**Major Contributions:**

- Designed complete backend architecture + APIs powering Admin Panel, Operator Panel, Web Portal, Customer App, and Engineer App.
- Developed four independent authentication systems (Admin, Operator, Engineer, Customer) using JWT + AES encryption with separate guards & middleware.
- Designed and delivered 150+ production APIs covering:
  1. Register/Login with OTP Verification Via Email/Phone
  2. Customer Onboarding, KYC Automation, Billing, Plans, Connection Booking
  3. Lead Management, Sales Operations
  4. Service Requests, Ticketing System
  5. Inventory Management (Routers, ONU/TR069, Extenders)
  6. Field/Fiber Engineer Job System, Installations & Setup.
  7. Payment Collection + Payment Gateway APIs
- Built a complete billing engine (auto-bills, previews, renewals, payment logs) and subscription plans, renewal logic.
- Implemented e-signature flow + PDF form generation with AWS S3 storage.
- Developed multi-role system for Sales, Fiber Installation Engineers, Admin.
- Created ticketing system, user activity logs, push notification integration.
- Implemented full Sales Target & Commission Engine for Engineers, including monthly target generation, role-based rules, plan-wise calculations, penalties, achievements, and automated commission payout logic with complete admin controls.
- Developed a complete customer referral system, including referral code generation, tracking, reward assignment, and automated credit logic integrated across the Customer App & Admin Panel.
- Managed deployment, environment configuration, and production release.

## • Coinspe – Crypto Exchange (FIU Registered & ISO/IES Certified)

### Description:

A secure digital asset management platform with wallet services, KYC, fiat management, and real-time trading modules.

**Website:** <https://coinspe.com>

**Mobile App:** <https://play.google.com/store/apps/details?id=com.coinspe.coinspe>

**Role:** Laravel Developer

**Tech:** Laravel, MySQL, PostgreSQL, JWT, AES-256, WebSockets, REST APIs.

### Major Contributions:

- Built JWT-based authentication, email & phone OTP verification, temp-token flow.
- Implemented 2FA, social login, and permission management.
- Implemented multi-database architecture (MySQL + PostgreSQL) with smooth data sync.
- Designed multi-wallet creation, multi-crypto/fiat support, credit/debit transaction APIs, frozen-balance logic.
- Developed Fiat deposit/withdraw workflows with admin approval layers.
- Implemented KYC verification system (Basic, Advanced, Corporate levels) via using third-party (Decentro/Signzy) production-level APIs.
- Integrated AES-256-CBC encryption, activity logging, and custom log channels.
- Built P2P trade automation, Binance rate calculation & tracking algorithms.
- Implemented role & permission system, social logins (Google/Facebook).
- Implemented repository pattern, custom cron commands, Swagger docs, and Laravel Log Viewer.
- Built real-time chat system using WebSockets.
- Developed modules for SEO meta management, blogs, announcements, domain management, expenses, etc.
- Built complete admin modules for users, wallets, deposits, withdrawals, expenses, P2P trade, etc.
- Included dashboards, reporting, activity logs, and admin-level permissions.

## • Easy Invoice Generator Tool

### Description:

The Easy Invoice Generator Tool is a web application developed using Laravel framework. It simplifies the process of creating and managing professional invoices.

**Key features include** a user-friendly interface, invoice customization options, automated calculations for line items, taxes, and totals, multi-currency support, PDF generation, client/product management, and also email integration ( Integrated email functionality to allow users to send invoices directly to clients from within the tool.)

The tool streamlines the invoicing process, saves time, and ensures professional and accurate invoices for better financial management.

**Tech:** Laravel, PHP, MySQL, HTML5, CSS3, JavaScript, jQuery, Bootstrap, etc.

## Professional Experience

### • Subhx Infotech (OPC) Pvt Ltd

Laravel Developer

May 09, 2024 - Feb 21, 2026

**Projects:** Coinspe, Subhx Connect, Bit24hr Admin

#### Roles & Responsibility:

- Leading backend development of major in-house financial & telecom products.
- Designed scalable architecture, APIs, cron jobs, encryption, and multi-DB flow.
- Managing production deployments and performance optimization.

### • Amura Marketing Technologies Pvt Ltd

Backend Web Developer

July 31, 2023 - Feb 29, 2024

#### Roles & Responsibility:

- Integrated Zoho, Insightly, Kylas CRM, Jodo APIs with Laravel.
- Built custom WordPress plugins, themes, post types, REST endpoints.
- Automated CRM data sync via Artisan commands (CSV export).
